

Twin Shaft Shredder SD-Series

Application:

Double Shaft series has been developed for particularly heavy industrial use. These two-shaft shredders are also known as rotary shears and are suitable in particular for shredding metals and tires. A four-shaft shredder is often used down-stream in a second shredding process to reduce granule size even further, and particularly high through-put rates can be achieved using this combination. Even with low speeds and very high torque the machines are capable of shredding heavy gauge metals. If you need to process very bulky or awkwardly shaped metal objects, a compression feeder will help to ensure the required through-put.

Twin Shaft Shredder

SD-Series

This machine is developed for shredding of Plastic, Paper, Wood, Municipal Waste, Bio Waste, Electronic Waste, Biomass, WEEE etc.

Production from 100kg to 1500 kg/hr.

MODEL	Main Motor (HP)	Knives size (mm)	Cutter House (mm)
PPM-14/20SD	10	25/40/75	350 x 500
PPM-17/20SD	15	25/40/75	425 x 500
PPM-19/20SD	25	25/40/75	475 x 500
PPM-23/24SD	30	25/40/75	575 x 600
PPM-30/33SD	40	25/40/75	750 x 825
PPM-40/33/SD	60	25/40/75	100 x 750
PPM-50/33SD	75	25/40/75	1250 x 825
PPM-60/33SD	100	25/40/75	1500 x 825

Why PANCHAL?

High-tech from the world market leader

Top-notch state-of-the-art recycling technology

Superior end product quality

Best customer service and care and therefore reliability for the user

Tailor-made, individual solutions possible through large engineering capacity with more than 28 years experience in plastic recycling technology

Superb reliability, flexibility and productivity

Your best partner
